

How can I help my child at home with their maths?

<p>Count regularly with your child up to 100 and backwards. Count in 1s, 2s, 5s and 10s.</p>	<p>Ask your child key number facts – What is 1 more/1 less than...? What is 5 more/less than...? If I added 10 to this number, what would it be?</p>
<p>Find fun ways to learn times tables. There are a lot of helpful youtube songs and rhymes that can support with this. Make it as fun as possible.</p>	<p>Make sure your child can correctly form all their numbers, ensuring they are written the right way around. Encourage your child to write numbers up to 100.</p>
<p>Include maths within your family life. Ask your child to count how many ___ are left in the bowl/cupboard. Ask them to help with paying for the shopping that week. Ask them to set the table for the amount of people needed. On a walk, ask them to count how many ___ they see.</p>	<p>Add/subtract numbers together with your child. Begin with adding/subtracting a 1-digit number from a 1 digit number. Then increase it to adding/subtracting a 1-digit number from a 2-digit number.</p> <p style="text-align: center;">$9 - 4 =$ $8 + 3 =$</p> <p style="text-align: center;">$43 - 3 =$ $38 + 5 =$</p>
